Cainta, Rizal

Experienced Full Stack Web Developer with **over 5 years of expertise** in building secure, scalable, and high-performing web applications using Laravel, Vue.js, and MySQL. Known for writing clean, maintainable code and streamlining development workflows. Successfully deployed a platform with **over 10,000 daily active users** and **received leadership recognition** for delivering high-impact solutions.

## Work Experience

### Software Engineer II - Web Development, Concentrix

June 2021 - Present

- Architected and developed secure and scalable Single Page Applications (SPA) using Laravel, Vue.js, and MySQL, serving over **10,000 daily active users** and contributing to **\$3 million** in cost savings for one enterprise application.
- Participated in Agile development with cross-functional teams to ensure timely and efficient project delivery.
- Created a reusable project scaffolding template in Laravel and Vue.js, reducing initial setup time for new projects and standardizing code structure across teams.
- Designed high-fidelity wireframes using Figma to plan user interfaces and improve usability.
- Built a documentation website for developers, covering project setup, data table creation, and best practices to support onboarding and workflow consistency.

### ERP Developer - Freelance, Sunpack Corporation

March 2020 - June 2021

- Rebuilt the company's legacy ERP system using PowerBuilder and MS SQL, replicating core functionality while adding new features based on updated business requirements.
- Identified and fixed application performance issues, optimizing slow queries and reporting queries to improve system efficiency and responsiveness.
- Enhanced the UI/UX of the application to improve user experience and usability, resulting in increased user satisfaction.

## Projects

### CNX Shuttle - Transportation Application

Laravel | Vue 3 SPA | Tailwind CSS

- A web and mobile application for Concentrix employees to view and manage company-provided shuttle rides, serving **100K+ users** with **10K daily active passengers**. The platform enabled over **\$100K** in cost savings and was recognized by company leadership for its impact.

### CNX Connect - Recruitment Platform

Laravel | Vue 3 SPA | Tailwind CSS | Shadcn UI

- A recruitment platform that allows candidates to track their application process while enabling recruiters to manage assessments efficiently. Recognized as one of Concentrix's most innovative projects, with an estimated **\$3 million in savings** and planned nationwide deployment in the Philippines.
